* We will add you to a mailing list for periodic updates about facility improvements. If you prefer not to be added to our mailing list, please leave out your address but tell us what neighborhood you live in.

1. Please give us your input on alternative sites for the new intermodal transfer facility

SPU has recommended that its proposed intermodal transfer facility be constructed on Corgiat Drive, south of Georgetown. SPU believes the Corgiat site is the best location for this important addition to Seattle's solid waste system.

Next, SPU will ask the Mayor's Office to send legislation to City Council, where the final decision about the site for SPU's intermodal operations will be made. ***Please circle your preferred outcome for the Council's decision, and explain below why you believe it is the best alternative (Please visit the station on intermodal siting for more information on these alternatives).***

1. Corgiat site on Corgiat Drive, between I-5 and the railroad tracks.
2. A site on Harbor Island, such as the Terminal 10 or Pendleton sites.
3. A site at Interbay near rail tracks (site not yet specifically identified).
4. Expansion of the existing North and South transfer stations through acquisition of more property near the stations (this is the option SPU would pursue if there were no new facility built).
5. The Edmunds site on Airport Way South, in South Seattle.

2. What can SPU do in the design and operation of its new solid waste facilities to be a good neighbor to your community?

3. What specific concerns, if any, do you have about garbage collection trucks traveling to and from a new intermodal facility at the Corgiat site?

4. SPU is considering several options for routing garbage trucks on arterials (through roads) near the Corgiat site. Please circle your preferred option and tell us why you think it is the best one (See Station #5 for more information)

Option #1—No restrictions on specific arterials, but non-arterials cannot be used except during collection

Option #2—Restrictions on Airport Way between Albro Place and Lucile Avenue

Option #3—Restrictions on Airport Way, Bailey Street, Stanley Avenue, Ellis Avenue and Corson Avenue

Option #4—Same as option #3 plus restrictions on 15th Avenue and Lucile Street

Option #5—Mandatory routes on Albro Place off ramp or Airport Way south of Hardy Street, all other Georgetown and Beacon Hill arterials prohibited

Option #5a—Same as option #5 plus overpass over Airport Way South

Are there other specific comments about SPU's plans to improve solid waste facilities that you would like the utility to consider?
